6th Floor Conference Room

Light refreshments served

BIOGRAPHY:

Dr. Munro is an expert in advanced treatment for cancer, including minimally invasive surgery and robot-assisted procedures. Her practice focuses on providing the most up-to-date surgical options for her patients, customized for their specific needs.

"I offer my patients aggressive surgical treatments in addition to innovative chemotherapy options suited to the biology of their cancer. I value my role as an advocate for my patients through all stages of diagnosis and therapy. The goal of our practice is to address our patients' needs and guide their treatment within an open dialogue, particularly as
